

Evidence interfaces

Q: Which entity answers the multi-hop query?

Raw context
D ... S ... D ... S ...

Support-first
S1, S2 → then distractors

Top-5 retrieval
ranked docs R1...R5

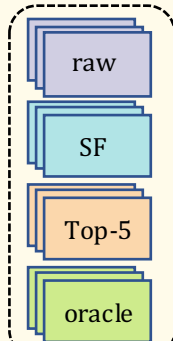

Oracle support
gold supporting evidence only

Structured
entity → relation → answer

⋮

Which interface makes the reader use the right evidence?

Training data
(q, Ei, a)

LoRA reader

$$\theta = \theta_0 + \Delta\theta r$$
$$\text{rank}(\Delta\theta r) = 8$$

$$F1(\text{raw}) = 0.780$$
$$F1(\text{SF}) = 0.806$$
$$\Delta = +0.026$$

Measuring evidence-interface effects

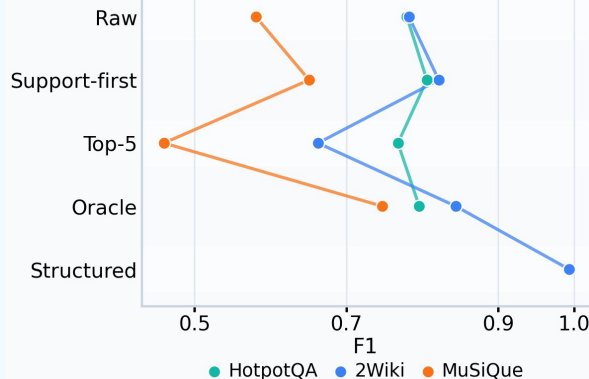

Remove support
and measure
F1 drop

$$F1(E_i) - F1(E_i \setminus S)$$

Support placement improves evidence use across readers

Finding: Evidence structure changes adaptation difficulty.
